2.Write a C program to simulate a Deterministic Finite Automata (DFA) for the given language representing strings that start with 0 and end with 1

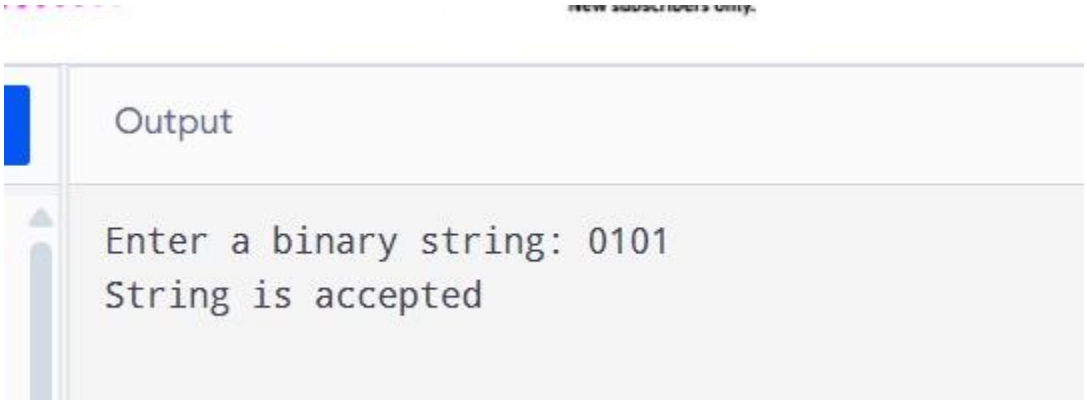

Check whether the binary string begins with 0 and finishes with 1

AIM: To write a C program to simulate a DFA that accepts strings starting with 0 and ending with 1

CODE:

Output:

RESULT: The program accepts strings that start with `0` and end with `1`, and rejects other strings.
